

Stripping and Cleaning Discs

The stripping and cleaning disc is a combination of tough yet flexible nylon polymer fibers with aggressive silicon carbide abrasive particles secured in place with smear resistant adhesives. The outcome is a series of surface conforming tools for cleaning surfaces and stripping paint, contamination, and many other undesirable surface conditions.

This disc is an excellent replacement for wire brushes, scrapers and other abrasives and can do many tasks faster and more precisely than other types of abrasion tools. Mount on straight shaft portable tools, right-angle tools, flexible shaft stationary tools or single or gang mount on stationary grinders to suit your unique applications.

Use the discs for these and other applications:

- Rust, oxidation and corrosion removal
- Clean up welds, remove weld blue, light spatter scale
- Strip paint from painted surfaces with minimal or no surface etch
- Remove a wide variety of sealants and coatings
- Remove oxidation and coatings for pre-paint or weld preparation
- Remove gaskets and gasket sealants
- Remove mold, algae, and other organic material
- Blend diverse surface conditions

Disc Size	Arbor Size	Color	Maximum RPM	Backing Plate Type
4"	7/8"	Black, Blue	13,300	T-27
4"	5/8" – 11 Hub	Black, Blue	13,300	T-27
4 1/2"	7/8"	Black, Blue	13,300	T-27
4 1/2"	5/8" – 11 Hub	Black, Blue	13,300	T-27
